

Daniela Breitman

Education

- 2021-2025 **PhD**, *Scuola Normale Superiore di Pisa*, Physics, supervised by Andrei Mesinger.
- 2020-2021 **MSc**, *University of Toronto*, Department of Physics, supervised by Keith Vanderlinde.
Project summary [here](#).
- 2017-2020 **BSc**, *McGill University*, Montreal, HONOURS MATHEMATICS AND PHYSICS.

Talks at Conferences

- September **6th Annual Global 21-cm Signal Workshop**, Trieste, Italy.
11-15 2023 21cmEMU: An emulator of 21cmFAST summary observables
- March 6-10 **Understanding the Epoch of Reionization**, Sesto, Italy.
2023 21cmEMU: An emulator of 21cmFAST summary observables
- November **iid2022: Statistical Methods for Events Data – Illuminating the Dynamic Universe**, Lake Guntersville State Park, AL, USA.
15-18 2022 21cmEMU: An emulator of 21cmFAST summary observables
- October **HERA Annual Meeting**, UC Berkeley, CA, USA.
12-14 2022 21cmEMU: An emulator of 21cmFAST summaries
- October **5th Annual Global 21-cm Signal Workshop**, UC Berkeley, CA, USA.
17-20 2022 21cmEMU: An emulator of 21cmFAST summary observables
- September **Cosmic Dawn/EoR SKA SWG Meeting**, Pisa, Italy.
27-29 2022 21cmEMU: An emulator of 21cmFAST summary observables

Research Experience & Awards

- May-July **Characterizing the Repetition Rate of CHIME Fast Radio Bursts**, *Victoria Kaspi*,
2020 McGill University, Value: \$6,000.00.
Continue the project on simulating FRB populations from my undergraduate thesis. Full [report](#).
- May-July **Solving the relativistic wave equation in FLRW cosmology using spectral theory on non-Euclidean spaces**, *Dmitry Jakobson, Linan Chen, Gantumur Tsogtgerel*,
2020 McGill University, Value: \$2,000.00.
 - On the torus \mathcal{T}^3 : Solved the relativistic wave equation and show that only one initial condition is required for the IVP of the wave equation.
 - On the sphere \mathcal{S}^3 and the hyperbola \mathcal{H}^3 : solved the time ODE.
- Summer 2019 **SURP**, *Ue-Li Pen*, University of Toronto, Value: \$9,500.00 + \$2,000.00 FRQNT BPCA.
 - FRB microstructure: Analyse FRBs with microstructure i.e burst components at the microsecond timescale.
 - FRB descattering: Correlate and descatter wide FRB pulses using different pulse components based on the work of Main et al. 2017 on the descattering of giant pulses. Full report [here](#).
- Winter 2019 **Tomlinson Engagement Award for Mentoring (TEAM)**, McGill, Value: \$300.00.
Conduct weekly tutorials for MATH 248 - Honours Advanced Calculus, awarded per the recommendation of the professor.
- Summer 2018 **USRA**, *Victoria Kaspi*, McGill University, Value: \$6,500.00 + \$2,000.00 FRQNT BPCA.
 - Develop a data visualisation web app using Bokeh to compare CHIME data with FRB and pulsar catalogues and view data statistics to monitor telescope sensitivity.
 - Develop a CHIME/FRB CPU monitoring system using Node.js in Javascript and HTML/CSS.

Selected Publications
